FLEXTANK
Flexible storage tank

FLEXTANK — FLEXIBLE STORAGE TANK

The Flextank is a flexible high quality storage tank which can be used for storage of almost all liquids. Our engineering department matches the basic design of our tank with the chemical requirements from the liquid you want to store.

Each combination of filling-, emptying- and/or other connections can be implemented in the design. The Flextank can be used as a temporary or permanent storage solution, where the tank is laid on the floor without specific measures or supports. The Flextank does not require any installation, the surface must be flat and smooth.

APPLICATIONS

- › Certification KIWA K73883 and ISO-9001
- › Maximum shape stable film
- › Breaking strength of the foil according customer's requirements
- › Suitable for storage drinking water gamma radiation 100% sterile
- › Guarantee (5 year) on film material and processing
- › Can be placed in any desired location

BENEFITS

- › All kind of liquids
- › Basic volumes : 1 tot 1000m³
- › Standard height 1.1 meter
- › Other sizes on demand
- › No installation required : unfolding and ready for use
- › Storage drinking water

Aggères protects homes and cities against flood caused by the rapidly changing climate and develops customized solutions for flood mitigation, perfectly adapted to the situation.
